OBJECTIVE

Full Stack Web Developer with an emphasis on Front-end technology:

- ⇒ To constantly improve code quality and apply new technologies to the projects I devote myself to
- ⇒ To develop into an think-out-of-the-box, communicative and proactive developer role based on previously gained soft skills
- ⇒ To gain expertise in the field and give back later

EXPERIENCE / PROJECT

2018.07 - Current Technical Intern @ WireDelta (Copenhagen)

A web agency based in Copenhagen which focuses on providing Web solutions to its clients.

- > Stack: HTML / CSS (BEM+SASS) / JavaScript (ES6) / Typescript / Angular6 / Angular Material / NodeJS / REST API, ongoing training for React + Redux and React Native
- > Worked on the front-end development of a SPA project for PMI
 - ◇ page responsiveness
 - ◇ new feature implementing
 - ◇ cross-browser compatibility
 - ◇ code optimization
- > Migrated a React app to Angular ([link](#))

2017.12 – 2018.06 Working on personal website and web projects

In a transitional period – move from China to Denmark, meanwhile learning programming independently.

- > Built a quiz SPA ([link](#)) with Asynchronous approach and API call
- > Built a movie search app ([link](#)) with API call
- > Built a responsive website ([link](#)) with animations and interactivity
- > Built a math utility app ([link](#)) based on user input

2015.5 - 2017.12 Administrative Officer @ Vspace Tech Dev Ltd

A startup company focusing on creating VR industry solution for business to implement VR experience product.

- > Taking multiple roles/responsibilities such as sourcing, administrative, accounting, marketing, event host

- > Built IT supply chain and managed international software engineer hiring process

2012.2 - 2015.04 Sourcing Specialist @ Importaciones Fermass CA

- > Independently built supply chain within China and in charge of all internal and external communication and transportation issues

CHINESE: Mother Language

ENGLISH: Professional Level

DANISH: Took Intensive Course

Copenhagen Center Area, Denmark
(Have Working Permit)

Hi, I'm Zoey from China. I came to Copenhagen in April 2018 and am planning to start my developer career in this lovely city.

I've been learning web development since December 2017 and fully devoting to it since April 2018 (10 hours of daily study).

Being new to the field is my advantage and disadvantage at the same time because it drives me constantly learning the best practices and the newest technology with a pair of new eyes. I'm passionate and excited to be in the coding field, and I absorb knowledges like a sponge.

Looking forward to the new opportunities! Let's build awesomeness!

EDUCATION

- 2018.06 – Today Full-Stack Web Developer @ Hack Your Future Code School (Copenhagen) ([link](#))
 - > A 6-month program for learning MERN stack (MongoDB, Express JS, React, NodeJS) , Git version control and coding collaboration
- 2011 - 2016 B.A. Degree of English Major @ Jiangxi Normal University (China)
 - > Proven English proficiency by IELTS 7.5 & TOEFL 103

COURSES

@ Codecademy.com: Learn HTML, CSS, SASS, JavaScript, Git, CLI, Responsive Web Design

@ Khanacademy.org: Introduction of JavaScript with Processing JS library

@ FreeCodeCamp.org: Introduction of Bootstrap, jQuery

@ Udemy: New features of ES6, Introduction to Angular 6, Introduction to NodeJS, JavaScript best practice

TOOLS

Development Tools (good command of usage):

NPM packages (toaster, gulp, sass, babel, lodash), Visual Studio Code, Postman, GitHub, GitLab, Git Bash

Productivity Tools (good command of usage):

Slack, AdobeXD, MS Office, Confluence, Jira, Trello, Asana, Photoshop, Marvel

VOLUNTEERING

- > 2017.11 Event Host @ GirlsCodingDay China
- > 2018.06 Country Coordinator @ 1MillionWomenToTech.org

INTERESTS

- ♥ Attending tech conferences (e.g. techfestival, techbbq, coldfront) and community events (CopenhagenJS, ngCopenhagen) to learn the latest technology and networking
- ♥ Jogging regularly (won three marathons)
- ♥ Playing strategy boardgames with friends
